

Rotary

January 14, 2020

Interpretation of a Rotary meeting from 3570 miles away.

The Crews' family must have contracted a neurological disorder that causes involuntary muscular response. What was going on at Rotary this week?

Evidently, Bob was the “Typhoid Mary” as it appears he was blasting the unknown agent into the air thereby causing general havoc!

Dave looks like he may have been bitten by a Zombie. Looking for fresh brain for lunch, Dave?

Dale looks like he has a bout of tourettes interacting with Craig with an outburst.

Jeff, thinking, “My face is trying not to say ‘My stomach isn’t happy’”

Decidedly uninfected, Dale and Tim are aloof over the fray.

“Maybe that cat in here is the thing that is causing all the trouble, Graham.”

Food to the rescue.

The LHS Football Team and Coach have an intervention with the club. They will stomp-out whatever ills Rotarians might have.
